MOSAICO

Management, Orchestration and Supervision of AI-agent Communities for reliable AI in software engineering

Transforming Software Engineering with AI Collaboration

MOSAICO is a European research project funded by the European Union. It will introduces a new ecosystem where AI-powered agents assist developers throughout the software development lifecycle—enhancing productivity, improving code quality, and driving innovation.

KEY FEATURES

Collaborative AI Platform

Enabling seamless interaction between AI agents and developers

AI-Powered Assistance

Automating tasks such as coding, testing, and deployment

Ethical & Responsible AI

Ensuring transparency, security, and fair AI governance

Open-Source & Community-Driven

Supporting long-term adoption and industry impact
